ABOUT US

THE LEADING MANUFACTURER

The JONIEC® company is a leading Polish manufacturer of concrete fences and elements of small garden architecture. The beginnings of our activity date back to 1991, when we started the production of split facade tiles under the name of JONIEC®.

30 YEARS ON THE MARKET

For 30 years, we have been developing our own innovative projects, implementing them into production. Innovation and modernity are crucial for us. During this time, we have specialized in the production of such products as: split fences, modular concrete fences, prefabricated foundations, planters, palisades, facade blocks. All our products meet the standards necessary to maintain the leading position on the very competitive and demanding European market.

TECHNOLOGIES

We are constantly looking for new, effective and innovative solutions. Thanks to the optimization of production, we obtain products of excellent quality. We care about maintaining the highest standards in both production and customer service.

SCRATCH FENCE

ROMA Nova

The ROMA Nova fence is a modern system composed of concrete blocks. The appearance and dimensions of the blocks are innovative and different from most fencing systems available on the market. This makes the fence stand out positively and gives the property a unique character. The colors of the ROMA Nova fence perfectly harmonize with the fashionable grey, which still reigns in modern design.

SCRATCH FENCE

ROMA Perfect

ROMA Perfect is a fence system that harmonize perfectly with the modern architecture of private and public properties. Thanks to SCRATCH technology the colours of the fence are exceptionally subtle and blending with the surroundings. Simple design and easiness of assembly are the assets that will be appreciated by the owners of the property as well as the contractors. The fence system has been awarded with the Golden Medal MTP 2020.

MULTIGRAIN FENCE

ROMA Classic

ROMA Classic fence system consists of simple and geometrical elements. This fence system will be appreciated by those who value minimalism and delicate asceticism in design. With the blocks of ROMA Classic system you can build classic fences with low foundation and slim posts as well as full walls which enable complete seperation of property from burdensome surroundings. The fence system has been awarded with the Golden Medal MTP 2018.

SPLIT FENCE

GORC® de Luxe GL22

GORC® fencing is celebrating its 20th birthday! The split block system, which was developed entirely by JONIEC®'s staff of professionals, premiered in 2003. Since its inception, the product has enjoyed unflagging popularity. This is due to the timeless and universal design of the fence, which can be matched with houses of classical architecture, but will also work well as the surroundings of modern estates.

CONCRETE ELEMENTS / SPANS

KOMBO®

KOMBO® concrete elements / spans are an alternative to metal, aluminum and wooden spans. KOMBO® elements have a variety of shapes and sizes, which allows you to combine them in many ways, obtaining a very attractive appearance of the fence. Concrete shapes can also be used to create unusual architectural solutions in buildings (railings, balconies, terraces, inserts in walls) and in gardens (walls, edges).

PALISADES

MOGIELICA

Palisades are elements of small garden architecture which help us subtly arrange surroundings. They are decorative elements that can enhance various landforms. They can be used to strengthen the slides or to build multi-leveled terraces. They are perfect for lawn edges, driveways, car parks and flowerbeds.

PLANTERS

MOONFLOR, PROFLOR

Garden planters can be a great decoration of our garden and terrace. Just like garden pots, they can be used to create various flower arrangements. You can grow a variety of plants in them: blooming flowers, green plants, perennials and herbs. The interlocking profiles of the planters ensure a stable horizontal joining connection, which makes it possible to use the lawns also for the construction of a concrete external fence or other structure used to diversify the area.

PRECAST FOUNDATIONS

BOARDS concrete

Using prefabricated concrete boards to build a fence is a perfect way to significant reduction of time and cost of the construction. Concrete boards have sizes that are compatible with the most of metal, wood fence panels available on the market. The concrete boards can also be used to build metal net fence.

PAVEMENTS

Split **BRICK**

Split brick is a material that can be used to build aesthetic garden pavements and pavements around the houses and garages. It's a product that can be used to build stairs of a terrace, small lanes and sites. Palette of tones enables to match the colour of the fence, elevation or other elements of premises. Palette of colours consists of unicolours (sand, black) as well as blends MULTICOLOR® (pyrite, onyx, vera, bronzite, goethite). Various colours of brick enable to create unique visual compositions. The space can be arranged with brick of the same size to create classic calm look or you can mix brick of various sizes to create an exceptional unique effect.

PAVEMENTS

Split **PAVEMENT**

Split pavement is a great alternative to traditional cobblestones. Non-standard tile sizes make garden paths, pavements or small garden squares built out of them obtain an original look. The material from which the split pavement tiles are made is concrete colored in mass, which means that the color does not wipe over time, and the whole retains its original aesthetics even with slight damage.

CONCRETE

CHEMICALS

NEW

5L

PROTECT Plus

PREMIUM

concrete fence impregnant

Impregnant with a strong darkening and matte surface effect, used for surface protection of concrete fence blocks, prefabricated and driveways. The product is characterized by high resistance to abrasion and slipping.

PROPERTIES

- INCREASES RESISTANCE TO ATMOSPHERIC CONDITIONS
- REFRESHES AND REVIVES FENCE COLOUR
- EXTENSES THE DURABILITY OF THE FENCE

NEW

5L

COLOURING

PREMIUM

impregnation dedicated to ROMA Horizon fences

Impregnant recommended for refreshing the existing color of a fence block or applying a completely new layer of color. It protects the seasoned surface of fence blocks. It has very good covering properties, high water vapor permeability. It is resistant to adverse weather conditions. Creates a matte and smooth layer resistant to abrasion and washing.

Recommended for vertical surfaces.

PROPERTIES

- HIDES COLOUR DEFECTS, STAINS, DISCOLORATION
- REFRESHES AND REVIVES FENCE COLOUR
- PERMANENT COLORING OF CONCRETE SURFACES

DOSTĘPNE KOLORY

graphite white

1L

PAINT

paint for painting
and renovating

Paint for painting and renovating concrete surfaces, of a very good resistance to atmospheric conditions and abresiveness and great adhesion to concrete surfaces. It is based on modern raw materials that guarantee the highest quality. We recommend the paint for refreshing the colour of the caps that may fade away over time.

PROPERTIES

- INCREASES RESISTANCE TO ATMOSPHERIC CONDITIONS
- REFRESHES AND REVIVES FENCE COLOUR

COLOUR

cream | steel | light brown | dark brown | black

5L

PROTECT

concrete fence
impregnant

Impregnant is used for concrete and stone surfaces. The preperation protects the elements from absorption of fouling and makes it more resistant to atmospheric conditions, it improves the look of the surface, enhances its colour and reduces abrasiveness. With limestone, sandstone or other natural stones it is recommended to make a test first.

PROPERTIES

- INCREASES RESISTANCE TO ATMOSPHERIC CONDITIONS
- REFRESHES AND REVIVES FENCE COLOUR
- EXTENSES THE DURABILITY OF THE FENCE

5L

COLOURING

impregnation dedicated
to ROMA Horizon fences

Coloring impregnation for concrete is an acrylic-silicone, water-soluble, protective, decorative impregnation for the surface of fencing blocks. Product dedicated to ROMA Horizon fences.

PROPERTIES

- HIDES COLOUR DEFECTS, STAINS, DISCOLORATION
- REFRESHES AND REVIVES FENCE COLOUR
- PERMANENT COLORING OF CONCRETE SURFACES

COLOUR

graphite white

5L

HYDROPHOBIC

impregnate for fences
water-based

Impregnant has excellent protective properties. Used on concrete stone surfaces. Excellent hydrophobicity, increases resistance to dirt and weather conditions, improves the appearance of the Surface.

PROPERTIES

- INCREASES RESISTANCE TO ATMOSPHERIC CONDITIONS
- THE SURFACE DOES NOT CHANGE PRIMARY COLOR
- EXTENSES THE DURABILITY OF THE FENCE

5L

MASTER

water-based impregnation for fences

Impregnate designed to protect porous and absorbent mineral surfaces exposed to water and difficult climatic conditions. Effectively prevents the formation of efflorescence. It reduces the tendency to get dirty by creating a transparent, stain-resistant film with the effect of enhancing the color.

PROPERTIES

- RESISTANT TO HIGH AND LOW TEMPERATURES
- CREATES A PROTECTIVE MEMBRANE
- REDUCES TENDENCE TO STAINING

1L

PREPARATION

preparation for removal of efflorescence

Professional preparation intended for effective removal of carbonate efflorescence – white stains and infiltration stains appearing on concrete products such as fence blocks, wall elevation, scarp elements and planters. Recommended for cleaning the surfaces before impregnation or painting.

PROPERTIES

- EFFECTIVELY REMOVES CALCIUM EFFLORESCENCE

600ML

SEALING GLUE IN THE FOIL

Sealing glue for fence and stone blocks

Sealing glue for fence and stone blocks, precast elements. A binder for glueing and sealing fence and stone blocks as well as precast elements. Strong, one-component adhesive polyurethane glue/sealant. Very good adhesion to concrete brick, metal and many other substrates.

The product requires a specialist sealant squeezer.

PROPERTIES

- RESISTANT TO HIGH AND LOW TEMPERATURES
- ENSURES QUICK AND EASY INSTALLATION FENCE BLOCKS
- INCREASES RESISTANCE TO ATMOSPHERIC CONDITIONS

300ML

SEALING GLUE IN CARTRIDGE

Sealing glue for fence and stone blocks

Sealing glue for fence and stone blocks, precast elements. A binder for glueing and sealing fence and stone blocks as well as precast elements. Strong, one-component adhesive polyurethane glue/sealant. Very good adhesion to concrete brick, metal and many other substrates.

glue squeezer is available in our offer.

PROPERTIES

- RESISTANT TO HIGH AND LOW TEMPERATURES
- ENSURES QUICK AND EASY INSTALLATION FENCE BLOCKS
- INCREASES RESISTANCE TO ATMOSPHERIC CONDITIONS

1L

LBN

plasticizer for concrete lbn

Plasticizer LBN is a preparation that we add to concrete mixture made on the site of construction. LBN gives the mixture plasticity which fills in concrete blocks of the fence accurately. Accurate filling the inside of the blocks is the guarantee that the concrete core will be durable and it will prevent the posts and foundations from cracking.

PROPERTIES

- PREVENTS REDUCTION OF CONCRETE VOLUME

300ML

CHEMICAL ANCHOR

two-component mass resin for gluing

Chemical anchor combines metal with concrete. A chemical anchor is a two component resin mass that is used to anchor components. The adhesive-shaped connection with the highest strength parameters is due to high adhesion to the ground and enormous hardness. The elements can be anchored at different depths to obtain higher load capacity. It is characterized by a low odor and high resistance to chemicals.

The anchor extruder is available in our offer.

PROPERTIES

- HIGH LOAD CAPACITY AND STRENGHT PARAMETERS
- HIGH RESISTANCE FOR CHEMICALS
- QUICK AND EASY ANCHORING OF ELEMENTS

FENCE ASSEMBLY

MANUAL

Fence should be built in accordance with the building art and provisions of building regulations. Information included in hereby guidebook are general guidelines and recommendations. In the case of designed fences, priority must be given to the builder's recommendations and guidelines. Investor and contractor, who has to obtain proper qualifications and authorizations are responsible for the overall work.
